

Free maths for home education, Years 3 to 6

BrightWren is free KS2 maths practice. Every topic for Years 3 to 6 is there, in the order English schools teach them, and you can pick any one. It works on a phone, tablet or computer.

Nothing to install

YEARS 3 TO 6

Practice by year and topic

36 topics

Marked straight away

A hint when it is wrong

Pick your child's year, then a term, the whole year or one topic. The questions are made fresh each time and keep coming for as long as your child likes.

You do not have to follow the National Curriculum at home, so use the school order as a guide or pick any topic.

brightwren.co.uk/maths/

A club had 42 members last year. That is 3 times as many as it has this year. How many members does the club have this year?

42

11

×

126

14

✓

Not quite. Read the story again: 42 is 3 lots of the smaller amount, so divide by 3.

► Show me how

TIMES TABLES

Times tables, with no time limit

2 to 12 times tables

10 or 25 questions

Your child picks the tables. A clock shows 6 seconds, but it never cuts them off. Every answer is marked as they go, and Go again brings back the ones they missed.

Good to know

No tables check or SATs. Home-educated children do not take them. Both are for children on a school's register (GOV.UK, the 2027 rules).

SATs papers to download. GOV.UK says home educators can download the 2027 papers from Friday 21 May 2027, after the tests.

Nothing to sign up for. No accounts, no adverts from other companies, and the site keeps nothing that says who a child is.

Independent. Not connected to the Standards and Testing Agency or the Department for Education.

Everything on one page

Practice by year, times tables, the tables check and SATs, and what each year covers.
