

The maths app your child will actually want to play

BrightWren Plus follows the topics their class covers, in the order schools teach them. It's designed to feel like an arcade game, while building lightning-fast maths skills on autopilot.

Years 3 to 6

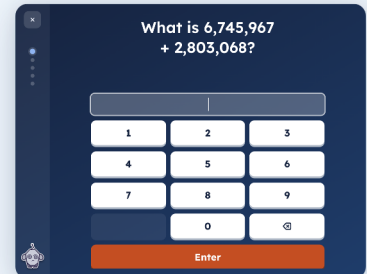

Free beta

Nothing to install

QUIZZES

Bite-sized practice that adapts in real time

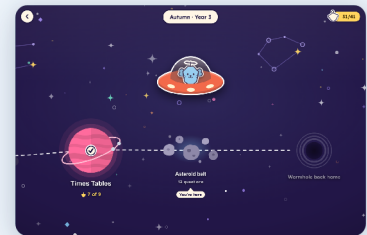

Choose a quick 5-question daily challenge or a 10-question sprint when they're in the zone. It becomes more challenging as they progress and turns wrong answers into a moment of learning.

THE GAME

A whole galaxy to explore

Kids fly through space, rescue cute aliens, and unlock upgrades by solving maths challenges. Each planet maps directly to what they are learning in school this term, meaning every minute of gameplay is actually productive practice.

REWARD

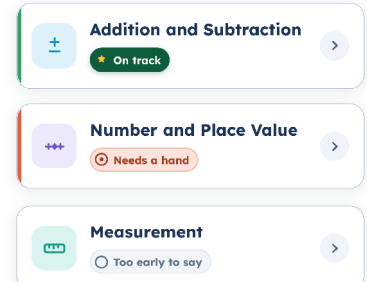

Celebrate every milestone

Boost motivation with digital trophies earned through consistent effort and skill milestones. From daily arithmetic practice to major exam prep like SATs, every achievement gets recognised and celebrated.

Tools & insights for parents

-  **One family account.** Individual school-year profiles under a single login.
-  **Topic by topic.** Every topic their year covers, and how each one is going.
-  **Habit tracking.** Spot active practice days and weekly milestones at a glance.
-  **Exam insights.** Monitor performance growth for national tests over time.

Join the beta and stay free

Completely free for early adopters. With passwordless login you can create your account with just an email address.
