

Free practice for the tables check and the SATs arithmetic paper

BrightWren is free maths practice for Years 3 to 6 in England. Both pages below work on a school iPad or a phone at home, and you are welcome to link to them.

No sign-up

No outside ads

Nothing to install

YEAR 4

Multiplication tables check

25 questions

6 seconds each

A mock built to the Department for Education's published rules: the same screen, the same six seconds, three warm-ups that do not count, and a score at the end. Answers are typed, not multiple choice.

A gentler practice mode lets a child pick the tables, and never cuts them off.

brightwren.co.uk/maths/times-tables-check/

$$6 \times 5 = \boxed{30}$$

YEAR 6

KS2 SATs Paper 1: arithmetic

36 questions

30 minutes

No calculator

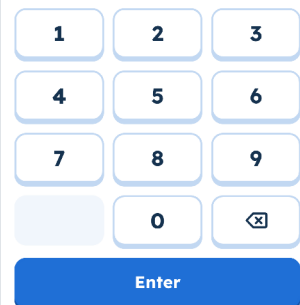

The paper's own length and its own clock. At the end comes the score, with how to work out the ones they missed. Practice mode has no clock, and shows the method whenever an answer is wrong.

Scored out of 40, like the real paper: the two long multiplications and the two long divisions carry two marks each.
